- 2 X 48mm Neodymium speaker drivers with passive bass radiator

Built-In long life battery 2200mAh Li-ion battery.
Up to 12 hour music play with one full charge

The Edifier MP233 combines the highest level of audio output and quality with the latest technology including Bluetooth connectivity and conference call features, all within a portable speaker device. The MP233 is equipped with a built-in microphone - allowing the user to use their Bluetooth, NFC paired mobile phone to answer phone calls, reject an incoming call and end a conversation at the push of a button. Hands-free phone conversations and multiple listener conference calls have never been easier. With the built-in Li-ion battery, the MP233 becomes a portable speaker system, ideal for outdoor use, holidays or the convenience to transport it from room to room. Bluetooth audio input provides flexibility for users to sync and play music from Bluetooth-enabled devices and to be able to move freely around without the constraint of cables. Additional devices can also be connected using the 3.5mm auxiliary input option. The system produces a total power output of 9 watts RMS, through two, 48mm full range speaker driver with bass enhancement through the built-in rear bass passive radiator. Top keypads change input selection, or move through next/previous tracks as well as adjust the volume.
